Norway

A journey
into Nordic
functionality
& cosiness.

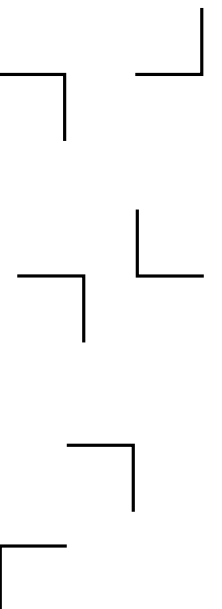

decor: Saga Oak
collection: Grand Avenue

The world's strongest floors, made in Norway.

Coming from the land of majestic nature, high pressure floors reflect **the beauty, functionality and strength of Scandinavian design and technology**. Incredibly tough yet exceptionally beautiful, high pressure floors will help you create your picture-perfect room.

From vibrant natural oak exuding authenticity and smooth, timeless wood designs to cozy, warm and harmonious styles and on-trend stone designs, these floors will infuse any interior with the relaxed sophistication of Scandinavian aesthetics. There are also several formats available, from standard size to extra-long and extra-wide.

A carefree floor for life!	6
Why choose high pressure floors?	8

Install. Finish. Maintain.	32
A CO ₂ negative floor!	38

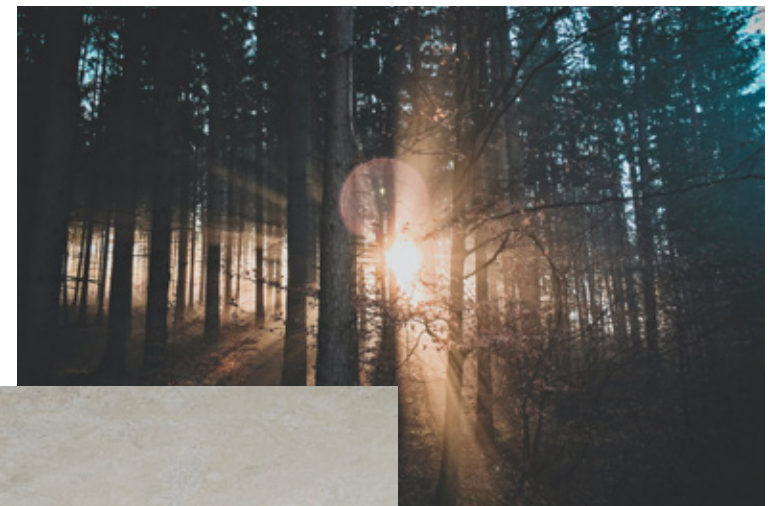

Discover the relaxed sophistication of Scandinavian interiors.

The Scandinavian lifestyle is characterised by simplicity, functionality, and a strong connection with nature. These core principles are reflected in our high pressure floors, which are designed and manufactured in our factory in Lyngdal, Norway.

These **premium quality, extra tough floors** can withstand all of life's daily challenges, whether at home with kids and pets or in high-traffic commercial space. Their commercial usage class of 34 and abrasion class 6 ensure exceptional durability for a lifetime of joy.

 made in
Norway

A carefree floor for life!

That’s right! Choosing a high pressure floor means choosing a **durable, carefree solution** for life. While there are many quality flooring options available, high pressure floors stand out from the rest. Their **unique construction** makes them significantly stronger, more scratch- and impact-resistant than other alternatives. A bold claim, we know — but one we’re confident to make. Let us share more details with you!

The power of the top layer.

The biggest strength can be found in the top layer. The top layer of high pressure floors consists of **4 layers**, including additional protective kraft papers. The extensive manufacturing process of high pressure floors uses **high pressure and high temperatures**, resulting in a harder surface that’s highly impact and scratch resistant. Paired with AluLoc Prime, our strongest locking system, and you’ve got yourself the world’s strongest floor.

Your flooring comparison guide.

We've compared various popular flooring types with our high pressure floors across **ten key features** to consider when choosing your floor, each rated on a scale of 5. Depending on which features matter most to you, you'll find the results in the below table.

key features to consider when choosing your floor. •	High pressure floors	Ceramic tiles	Vinyl	Laminate	Parquet	Carpet
Positive impact on the planet (CO ₂ score)	●●●●●	●○○○○	●●○○○	●●●●●	●●●●●	●●○○○
Impact resistance	●●●●●	●●●●○	●●●●○	●●●●○	●●●○○	●●●●●
Scratch resistance	●●●●●	●●●●●	●●●○○	●●●●●	●●●●○	●●●●●
Water resistance	●●●●○	●●●●●	●●●●●	●●●●○	●●●○○	●●○○○
Stain resistance	●●●●●	●●●●●	●●●○○	●●●●○	●●●●○	●●○○○
Sound absorption	●●●○○	●●○○○	●●●●○	●●●○○	●●●○○	●●●●●
Soft underfoot	●●●●○	●●○○○	●●●●○	●●●●○	●●●●●	●●●●●
Ease of installation	●●●●●	●●○○○	●●●●●	●●●●●	●●●●●	●●●○○
Ease of repairing or removing a damaged plank or tile	●●●●○	●●○○○	●●●●●	●●●●○	●●●●○	●●●○○
Total cost of installation	●●●●○	●●●●○	●●●●○	●●●○○	●●●●●	●●●○○

Overall, high pressure floors comes out as **the best possible alternative**, compared to the other five flooring types. Still unsure? Keep reading — on the following pages, you'll discover many more reasons to choose high pressure floors.

Strong moments.

Are you looking for the most durable flooring option for your home or project? Look no further.

The strongest lock

AluLoc Prime, our unique and patented aluminium locking system, now features an improved lock on the short side of the planks of Grand Avenue and Grand Majestic, made of **100% recycled polymer**. This feature adds even more strength to the already robust high pressure floors, also making them ideal for large, heavy-traffic commercial spaces. In fact, you don't even need to use an expansion profile for areas up to **15 x 15 m**.

No special tools are required, making the installation quick and easy. Simply push down the planks and the lock fixes the plank into place.

A pioneering technology

In 1996, our factory in Lyngdal developed a glue-free aluminium locking system, marking a true pioneering technology that revolutionised the flooring industry. The ultra-strong aluminium locking system, patented worldwide, can hold up to **1 200 kg per linear metre**. The supreme technology is a key reason why these floors are **ideal for very intensive use**.

decor: Etna Brown
collection: Grand Majestic

Extremely impact resistant

Whoops, something heavy fell on the floor. No worries! The thick, high-quality top layer of high pressure floors consists of multiple layers and features **a super-strong protective surface**. It can withstand serious impact and still remain mark-free and undamaged.

Scratch resistant

Wondering how our high pressure floors will deal with lots of footfall, office chairs, trolleys, pet paws or toys? Here's a hint: you won't see a single scratch! The **AC6 wear layer** offers the highest protection available in its class. These floors are extremely scratch and stain-resistant, making them perfect for very intensive commercial traffic or a busy home life.

decor: Danish Pine
collection: Grand Majestic

Carefree moments.

In the hustle and bustle of home and work life, things may not always go as planned, but your floor isn't something you need to worry about.

A pre-attached SilentSystem

Exclusively available in the 'comfort' sub collection, this premium sound-absorbing underlay attached to the back of the plank, reduces noise by more than **19 decibels**. Plus, the built-in underlay eliminates the need to select and install a separate underlay, ensuring a smooth, easy and fast installation.

Completely water resistant

Spilled something on the floor? Did the rain get inside? Muddy boots? Wet pet paws? No need to worry, the robust **water-resistant top layer** protects both the surface and the bevels. Even the HDF core of the plank is entirely water-resistant. So they are perfectly capable of withstanding all forms of spills at home or in commercial spaces.

Made to last a lifetime

Our high pressure floors are **made from the best materials and rigorously tested** for strength, water resistance, impact damage, fading and discolouration, as well as stability and wear. We wholeheartedly confirm that this floor meets the conditions of a lifetime warranty for residential use and a ten year warranty for commercial use. Totally in love with your floor? You can even take it with you to your next home and re-use it there. Long-lasting and sustainable!

A blend of form
& functionality

decor: Ibiza Oak
collection: Original

Beautiful moments.

While many design styles have come and gone, there's one that has stood the test of time: Scandinavian design. Bring this serene, practical essence of this style into your interior with our high pressure floors, inspired by the Nordic landscapes adorned with rivers, islands, forests and fjords.

decor: Freya Oak
collection: Grand Avenue

New structures for sensory richness

The different structures of our high pressure floors bring an element of the outside world into your interior and cover various wood species. From soft, matt surfaces with a warm glow and detailed wooden grain structures to brushed textures and realistic stone and concrete designs. Our Norwegian team of experts carefully select and design every decor, resulting in the most balanced and harmonious looks.

Rustic wood
grain structure

decor: Hasta La Vista
collection: Original

Colours inspired by Nordic nature

Scandinavian interiors typically favour a **light and balanced palette** of whites, grays, and beautifully muted tones creating a clean, cozy and serene ambiance. These colours reflect the Nordic climate and landscapes, where snow and rocks dominate, seamlessly bringing the outdoor in.

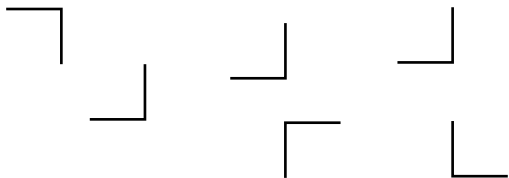

Looking for a floor with a **weathered character, with knots and cracks**? The collection also offers dark brown floors, including traditional oak and forgotten wood species like pine, ash, and chestnut. **Prefer patterns**? We've got you covered! The collection includes various two and three-strip designs as well as our iconic Hasta La Vista decor.

We've introduced **two brand-new structures** to our already extensive portfolio, that are nearly indistinguishable from real wooden floors.

The **rustic wood grain** boasts an authentic character with a vivid and realistic wood look. The **wood grain** structure offers a softer, more refined look with fine lines throughout the plank, making it a perfect all-rounder. Both structures feature a silky matt surface that is very easy to clean.

Strong floors made for any project.

Before you dive into the full collection, here's a quick overview of what you can expect. There are three high pressure floor collections, each with different plank sizes. Each collection offers a variety of wood and tile designs, with optional features to suit your project.

Planks of all sizes

standard planks — 198 x 1207 mm: Original
extra-long planks — 241 x 2410 mm: Grand Avenue
extra-long & wide planks — 303 x 2410 mm: Grand Majestic

Nordic inspired wood & tile decors

from vibrant natural oak exuding authenticity and smooth, timeless wood designs to on-trend stone designs: choose from **59 decors**.

Features fit for any project

core: without SilentSystem attached to the plank, available with standard 0, 2 or 4 bevels

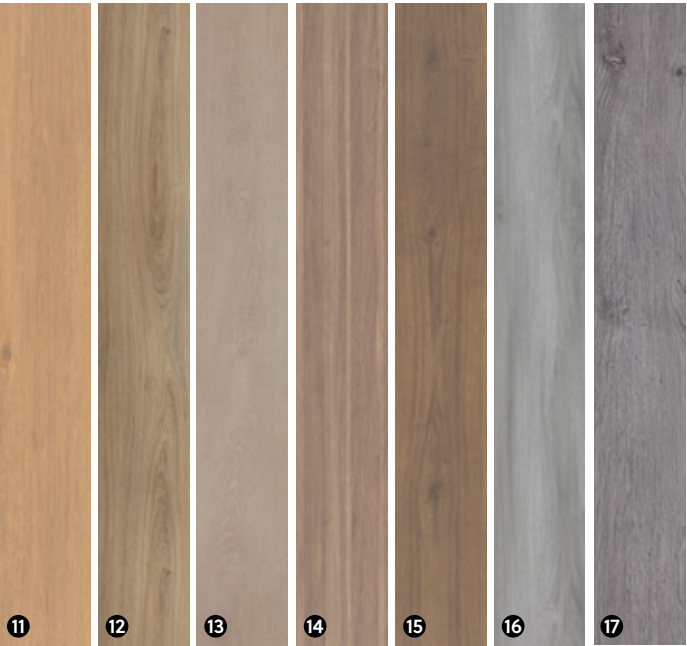

comfort: with SilentSystem attached to the plank, available with standard 0, 2, 4 or 4 micro bevels.

A full overview of the high pressure floors collection is available on p. 18-27.

Original.

With its 31 decors in **a standard plank size** (198 x 1207 mm), Original will take you on a global adventure in style. Find your favourite colour amongst various wood and stone designs. Looking for a shipdeck pattern? Or a sleek, concrete look? The Original collection has it all, bringing a unique look and authentic feel to busy homes and businesses.

Great spaces,
cosy places.

Harmonise your floor with your interior!

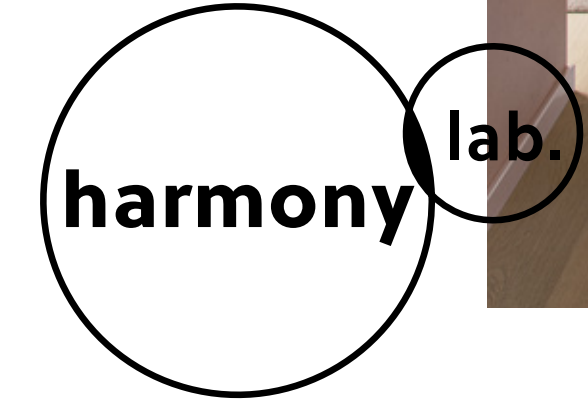

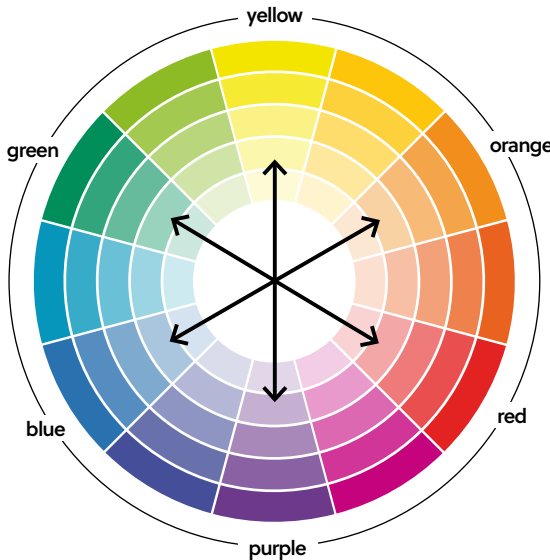

You've chosen your new floor — that's great! Now it's time to harmonise it with the rest of your interior.

While the colour of your floor seems fairly obvious at first sight, it has a whole layer of subtle undertones. This underlying shade is called **the colour character** of your floor. **Harmony Lab** will help you to match this with the colour scheme of your interior.

How it works

The colour character of our floors are categorised in 6 colour groups:

- yellow
- orange
- red
- purple
- blue
- green

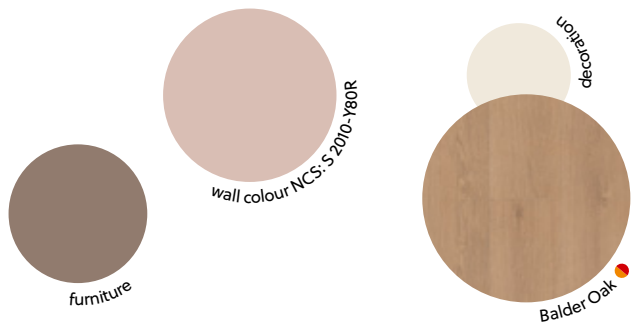

Once you know the colour character, the **chromatic colour wheel** will guide you in your decisions.

Using **harmonious colours** means using colours on the colour wheel that are either the same colour or the neighbouring colour of your floor's colour character. For example: if your floor has a blue character, this means using variations of blue, green, and purple.

Using **contrasting colours** means using colours that are directly opposite to your floor's colour character on the chromatic colour wheel. For example: if your floor has a yellow character, offset it with purple elements in your interior.

You can find the colour character for every decor of our high pressure floors on p. 18-27.

Harmonious colours

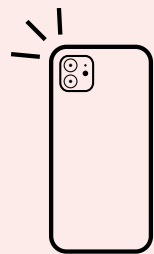

Contrasting colours

Are you having difficulty imagining your new floor in your own room? **Floorfit** has got you covered. This **digital tool** simulates your top picks in a room of your choice. Take a moment to try out your favourite choices and figure out what suits your style best!

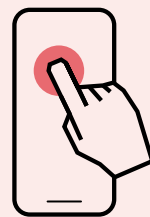

Visualise your floor in your own interior with Floorfit.

Find out how it works:

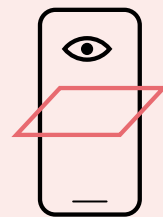

Snap

Take a photo of your room and **upload** it to **Floorfit**. Or choose from a range of standard rooms in the tool.

Select

Choose the **colour** you want to visualise through the built-in filters. Don't forget to select a laying direction and pattern.

Floorfit

Have you found your dream floor? **Share** your final look with family and friends, or get in touch with your **local BerryAlloc dealer** for the next step.

What are you waiting for?
Floorfit it out!

A hallmark of
Scandinavian
design.

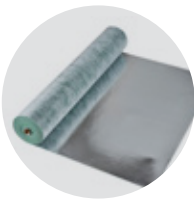

decor: Via Roma
collection: Grand Avenue

Install.

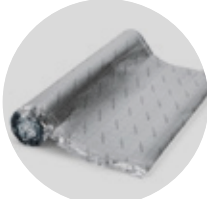

Underlays

If you chose 'core', without SilentSystem attached to the plank, you can either glue the floor using our wood floor glue or install an underlay. A high-quality underlay can prevent creaking and reduces the sound of your steps in the room and the floor below. It's an essential item to keep your floor in great shape and will significantly improve your living comfort once installed.

Wood floor glue

Only applicable for Original Core and Grand Avenue Core. Use this wood floor glue to avoid T-profiles, cover areas over 15x15 m or enhance the acoustic comfort within your space. The easy-to-use glue also reduces energy consumption in floor heating systems, and ensures a clean installation. SKU 63003597

Starter Kit

The spacer blocks help maintain the correct distance between walls and floor during installation. The metal pull bar simplifies installation on the final plank of each row and the last row of your installation. SKU WD180000

Tapping Block

This tool is used to install the BerryAlloc Original floors (HighTech Loc). It helps avoid damage to the locking system. SKU WD180003

Fillertwine

Use the Fillertwine joint sealing strip as a base for sealant. Fill in all expansion gaps with Fillertwine to make sure your floor can still shrink and expand, without exposing it to water. 10 m / Ø 6mm. SKU 63000771

CAN I INSTALL MY FLOOR OVER AN EXISTING FLOOR?

Yes, you can, but depending on the sub collection, you may need to install a moisture barrier*.

core: this comes without SilentSystem attached to the plank, meaning you have to select **an underlay**. Make sure to choose an underlay that includes a moisture barrier, like all BerryAlloc underlays (see table on p. 32).

comfort: this comes with SilentSystem attached to the plank, however in this case, the specially developed BerryAlloc **moisture barrier underlay must always be used**.

If you are installing directly onto a **wooden surface**, there's no need for a moisture barrier.

* a moisture barrier is a protective layer installed between the existing (sub)floor and the floor to protect the floor from moderate amounts of moisture in the existing (sub)floor.

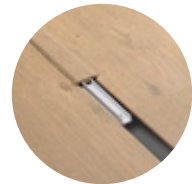

decor: Embla Oak
collection: Grand Avenue

Finish.

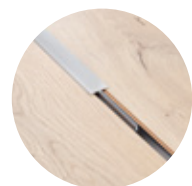

Profiles

Choose profiles that smoothly connect one room to the other while respecting the expansion gap requirements. From matching colours to modern aluminium, there's a profile to suit every style.

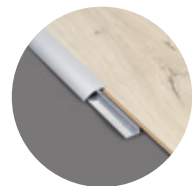

T-profile, matching

Smoothly connect one room to the other while respecting the expansion gap requirements. Adjustable to heights of 9 – 13 mm. Suitable for all our high pressure floors. 2400 x 44 mm (L x W)

Alu T-profile

Seamlessly connects two floors and hides expansion gaps. Adjustable to floors of heights 7 – 12,3 mm. 2000 x 31,5 mm (L x W)

Alu reducer profile

Ensures a seamless connection between floors of different heights or types (tiles, carpet, etc.). Adjustable to floors of heights 7 – 12,3 mm. 2000 x 46 x 11,7 mm (L x W x H)

Alu end profile

A neat finish for the edges of your high pressure floor. Adjustable to floors of heights 7 – 12,3 mm. 2000 x 20 x 7 – 12,3 mm (L x W x H)

*Match
your floor*

Skirtings

Our skirtings bring a touch of elegance, seamlessly bridging the gap between the wall. Do you want **matching skirtings**, fully in line with your new floor? Or **white, paintable** skirtings to take you in any decoration direction?

*Match
your wall*

Skirting, matching

Available in every high pressure floor decor
Installation: nail, glue, or clips.
2400 x 14 x 60 mm (L x W x H)

Skirting, white

White, paintable skirtings for a modern look.
Installation: glue or clips
2400 x 14 x 60 mm (L x W x H)
2400 x 12 x 80 mm (L x W x H)
2400 x 14 x 100 mm (L x W x H)
2400 x 14 x 110 mm (L x W x H)

Quarter round, white

White, paintable quarter round skirting for a minimalistic look.
Installation: nail or glue.
2400 x 14 x 14 mm (L x W x H)

Cover skirting, white

Ideal for renovations. Designed to be installed on top of existing or damaged skirting boards.
Installation: glue
2400 x 14 x 110 mm (L x W x H)

HOW SHOULD I INSTALL MY SKIRTINGS?

There are **two ways to attach** your **skirtings** to the wall.

Glue it

Use our **BerryAlloc glue**.

(*) Only for 60 and 80 mm

Fix it

Use **clips*** and **plugs**.

Stairnose

Make your stairs blend in perfectly with your floor and interior.

Our stairnose perfectly matches the floor in colour and structure, providing the same level of wear resistance. Its strong locking system guarantees a smooth, edge-free transition between the floor and stairs. Easy to install, clean, and maintain, it is an ideal solution for stair renovations.

Before

After

Maintain.

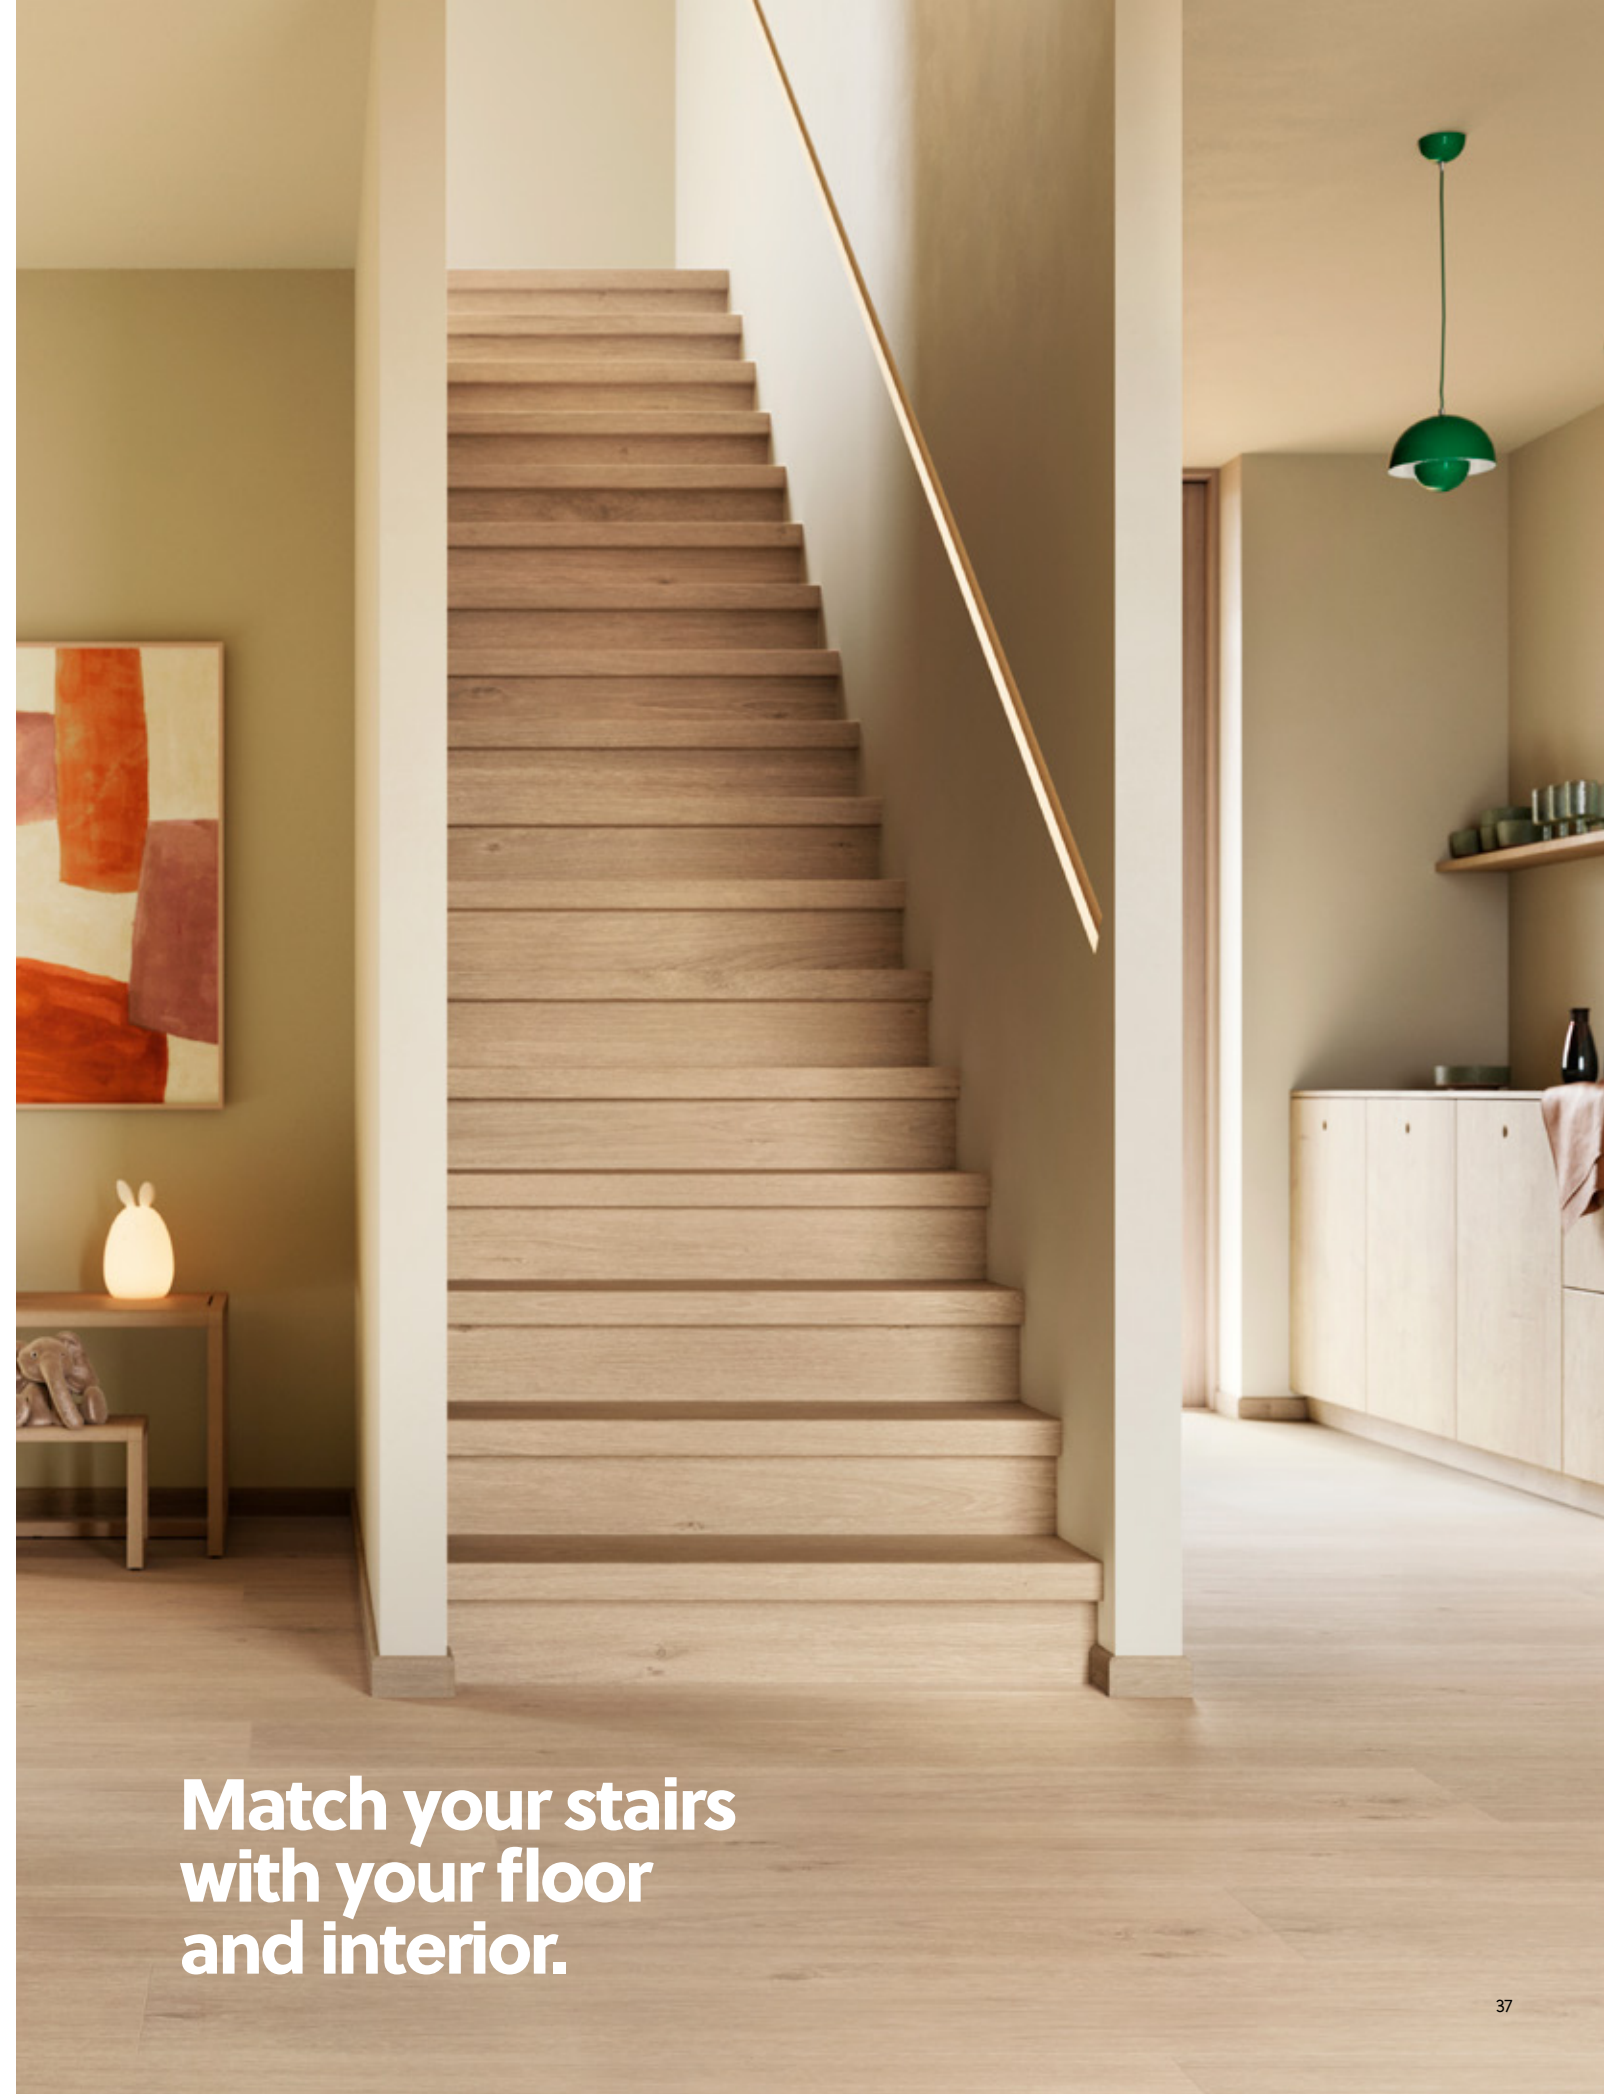

Cleaner Ultra

This antibacterial high pressure floors cleaner is suitable for first-time maintenance and regular use. Rinsing is not necessary. 1 litre.

Match your stairs
with your floor
and interior.

The **ecological advantages** of our high pressure floors are undeniable. Made with the full lifecycle in mind, they use natural materials and are produced with significantly less energy than some other flooring options on the market. So what are you waiting for?

Get yourself a CO₂ negative floor.

Choose with earth in mind!

Did you know that a tree absorbs approximately 25 kilograms of CO₂ each year?

Our high pressure floors are made with recycled kraft paper and a premium HDF core sourced from sustainably managed European forests. Since these materials are wood-based, they also **capture CO₂** — on average 4 kilograms per square meter. By choosing a high pressure floor, **you are choosing a flooring solution that positively contributes to reducing greenhouse gas emissions.**

Let's make a simple comparison.

The average living area of a house in Flanders (Belgium) is roughly 160 m². When comparing **the environmental impact** of producing ceramic tiles versus high pressure floors, here's what you can expect:

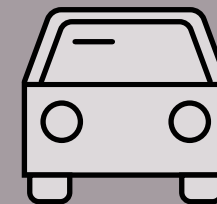

ceramic tiles
1 760 kg
of CO₂ **released**
into the atmosphere.

high pressure floors
640 kg
of CO₂ **captured**
into the planks.

This means **2400 kg less CO₂ is released into the atmosphere.** Having trouble picturing what that means? Let us help!

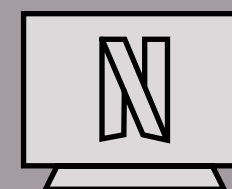

You can compare this to ...

driving
22 000 km
with your car.

printing
24 000 000
sheets of paper.

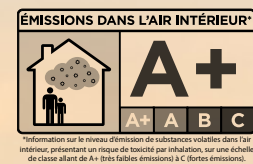

watching
130 000 000
'half-hour' series on Netflix.

We truly care.

Scandinavian design is deeply rooted in a respect for nature and a commitment to environmental responsibility. That is why, at BerryAlloc, we take extra care to respect nature in producing our high pressure floors and strive to create as little waste as possible. Products are strategically **manufactured in Europe** which helps us to reduce our carbon footprint.

But that's not all. Building upon the environmental and safety guidelines, we brought innovation and quality into the mix. After all, **ensuring a healthy indoor air quality is one of our biggest priorities**. Our commitment is backed by certifications like the Finnish M1 classification and the French A+ indoor air quality certification.

Innovation & quality for a healthier home.

Recycled kraft paper

The top layer contains 2 kraft papers impregnated with certain resins. These layers are primarily **made from recycled paper** and are produced locally in Norway.

A strong lock with a smaller footprint

AluLoc Prime, featuring on the short side of Grand Avenue and Grand Majestic, is made from 100% recycled polymer and has **four times lower emissions** than the aluminium used for the entire click system. Additionally, we use less material which decreases weight and enhances transport and logistics efficiency.

PEFC-certified

Our high pressure floors are PEFC-certified (Programme for the Endorsement of Forest Certification), supporting the promotion of **Sustainable Forest Management**.

Made with love, in Norway

Every high pressure floor is made in Norway – a label we're proud to wear. The entire creation process, **from concept and design to manufacturing and packaging**, takes place in our plant in Lyngdal, Norway, under the careful eye of our dedicated experts.
